

Feed Safety Policy

The top management of R2 Agro recognises the importance of food safety through the whole food safety chain, not least in areas where R2 Agro purchase, process, store and distribute feed products.

R2 Agro's goals for the feed safety policy:

- To supply feed products of the highest quality which comply with legislative requirements, agreed customer requirements and which at all times provide the best possible feed safety.
- To safeguard the environment and produce sustainably.
- To ensure a healthy physical and mental working environment for all employees.
- To ensure an efficient internal communication enabling us to quickly carry out a possible recall.
- That the necessary resources at all times are available to ensure the above.

In order to reach our goals:

- We use best practice technology and knowledge.
- We carry out regular review and identification of risks and critical control points.
- We carry out timely implementation of efficient control and monitoring measures.
- We comply with legislative requirements, agreed customer requirements, and other GMP+FSA/FRA MI 105 requirements.
- We employ competent staff, use reliable toll producers and purchase from well-reputed suppliers.
- We give our employees sufficient information about food safety, training, instructions, tools and equipment enabling them to carry out the work in a hygienic and professional manner.
- We encourage personal hygiene and cleanliness among our staff, suppliers, and visitors.
- We develop and thrive to continuously improve our processes so that these at all times can ensure safe products through an efficient and appropriate quality system.
- We communicate, implement, and maintain this feed safety policy at all levels in the company.

This Feed Safety Policy is approved by the top management at R2 Agro. It will be reviewed and if necessary revised once a year enabling us to be kept updated. Furthermore, it will be published on the company website.

Feed Safety Management System

In order to ensure that the feed policy goals are reached, R2 Agro have established a quality management system according to GMP+FSA 2020 including Hazard Analysis Critical Control Point-system (HACCP).

The focus points of the quality management system are:

- Supplier control
- Risk analysis of raw material and production processes
- Risk management of our production processes
- Ensure traceability of all our products
- Prevent feed fraud
- Prevent hacking of IT-system
