

# CarboTok

## Complementary mineral feed for support of good gastrointestinal function

CarboTok is a mineral feed supplement to be used for supporting good gastrointestinal function in calves and cattle. CarboTok has a high content of Kaolinitic clay, which works as an adsorbent and hereby supports a firm faecal consistency.

### CarboTok contains:

- Kaolinitic clay has a large surface area and therefore has the ability to bind intestinal fluid and support a good gut flora

### Benefits and effects:

- Contributes to a normal functioning intestine and a firm faecal consistency
- Growth is supported
- Can be used in organic production

### Consumption:

Depends on animal species

### Packaging:

- Bags of 20 kg
- 50 bags per pallet

*CarboTok can be used in organic production in accordance with regulation (EU) 2018/848*

### Application:

When applying CarboTok for milk fed calves, add 6-10 grams per litre milk just before feeding.

When applying CarboTok for other animals than milk fed calves use the following instruction:

- Dairy cows: 150 grams per day
- Other cows and heifers: 100 grams per day
- Calves: 35-50 grams per day

**Successfully used  
for milk fed calves  
on Danish farms  
over 5 years**
