MilkDigester™ Liquid

Efficient acidification of milk for calves

MilkDigester Liquid is a concentrated complementary product for acidification of milk for calves, which minimize growth of harmful bacteria in the milk and furthermore provides natural antioxidants for minimizing of oxidative stress in the calf.

MilkDigester™ Liquid contains:

- Strong organic acid preservatives for keeping the milk fresh and palatable
- Organic acids for improvement of milk hygiene and digestion
- Plant extracts adding natural antioxidants
- Molasses, which makes it less corrosive and ensures good palatability

Successfully tested over 2 years on Danish farm

Also allowed in EU Organic calf feeding

Benefits and effect:

- Concentrated preservative product to be used from the start of collecting milk
- Prohibits unwanted growth of microorganisms in milk, which is not jet adequately cooled
- Ensures fast coagulation of milk in stomach/intestines
- Supports a healthy gastrointestinal function
- Natural antioxidants minimize oxidative stress and strengthen the immune system
- Ensures optimal growth of milk fed calves
- Easy to use and to dose with a 30 ml dose pump

Application:

MilkDigester™ Liquid is added in the collecting tank before milk is pumped into the tank

Add 0.3-0.4 ml per litres of milk

- 0.3 ml equals a dosage of 30 ml MilkDigester™ Liquid in 90 l milk

Consumption:

5 L canister – enough for 12.500-16.600 litres of calf milk

Packaging:

- 5 L canister
