

MilkDigester™

Efficient acidification of milk for calves

MilkDigester is a complementary feed for acidification of milk and milk replacers for calves, which besides minimizing the growth of undesirable bacteria in the milk, also optimises coagulation of milk in the intestine, thus supporting milk digestibility.

MilkDigester contains:

- Preservatives which keep the milk fresh and palatable
- Organic acids to support milk digestion
- Electrolytes to contribute to optimum electrolyte balance

Benefits and effect:

- Provides good milk hygiene
- Support milk fat digestibility
- Secures optimum coagulation of the milk in the intestine
- Supports healthy gastrointestinal flora
- Minimizes growth of undesirable microorganisms

Application:

Administer 10-15 grams per 25 litres of milk. In automatic feeding systems administer 75-125 grams per 25 kg of powder. MilkDigester should be added to the milk just before feeding.

Consumption:

1 bucket (3 kg) is enough to acidify 7500 litres of milk

Packaging:

- Bucket of 3 kg
- 120 buckets per pallet
