

ReVital™

Efficient electrolyte product with pectins and lactic acid bacteria

ReVital is a dietetic complementary feed which stabilizes and restores the fluid and electrolyte balance in calves suffering from digestive disturbances (diarrhoea). ReVital contains the important electrolyte salts Na^+ , K^+ , and Cl^- , which are optimized from the American SID concept (Strong Ion Difference), ensuring quick and efficient rehydration.

ReVital contains:

- The electrolytes Na^+ , K^+ , Cl^- which efficiently re-establish the electrolyte balance
- Pectin substances protect the intestinal wall and binds toxins
- Alkaline buffer prevents blood acidosis due to digestive disturbances (diarrhoea)
- Dextrose ensures easily absorbable energy and stimulates absorption of Na^+
- Lactic acid bacteria inhibits growth of pathogenic microorganisms

Packaging:

- Sachets of 120 g
- 10-15 sachets per case
- 2.5 kg bucket
- 10 kg bucket

Benefits and effect:

- Adds an optimum supplement of vital electrolytes
- Counteracts digestive disorders
- Neutralizes blood acidosis
- Ensures easily absorbable energy
- Re-establishes the micro flora in the intestinal tract
- Can be used in milk

Content	Recommend. mmol/L	ReVital mmol/L
Na^+	70-145	119
K^+	20-30	27
Cl^-	50-100	66
SID	60-80	80

Application:

Mix 120 grams of ReVital in the used quantity of milk/milk replacer per feeding and administer for the calf. When mixed in water use 120 grams of ReVital in 2 litres of lukewarm water (35-40 °C). Administer ReVital twice a day for 1-3 days.

Consumption:

10 kg ReVital are enough for approx. 80 allocations
