

Bio Bolus Se™

Dietetic trace element bolus containing selenium for cattle

Bio Bolus Se is a slow releasing trace element bolus, which over a period of 180 days daily provides grazing and forage fed cattle with selenium and other important trace elements. Bio Bolus Se can also be applied as supplement to other mineral supply, or for cattle receiving roughage without additional supply of trace elements.

Bio Bolus Se can be used in organic production in accordance with regulation (EU) 2018/848.

Bio Bolus Se contains:

Daily supply from 1 bolus in 180 days

Selenium	1.2 mg
Cobalt	2.7 mg
Iodine	23 mg

Consumption:

1 bolus per animal.

Packaging:

- 10 boli per case
- 8 cases per box

Benefits and effect:

- Releases a daily supplement of trace minerals over 6 months
- Secures sufficient selenium supply, which is important around calving
- Optimises animal general condition
- Minimises risk of failure – the cow gets the intended amount
- Easy and quick to administer with a bolus applicator
- Can be used in organic production

Application:

Bio Bolus Se is administered with a bolus applicator. For dry cows, administer one bolus 2 months before calving. Should not be administered for cattle below 300 kg. Before using, it is recommended to have advice from a veterinarian or nutritionist concerning: 1) the balance of trace elements in the daily ration; 2) the trace elements status of the herd.
