

CaphosBalance™

Prevents milk fever and "downer cow syndrome"

CaphosBalance is a fast acting calcium and phosphorus supplement with magnesium and selenium, which effectively prevents milk fever and reduces the risk of "downer cow syndrome" after calving. One dose of CaphosBalance provides 35 grams of calcium and 25 grams of phosphorus to the cow.

CaphosBalance contains:

- Easily absorbable calcium prevents against milk fever
- Easily absorbable phosphorus prevents against "downer cow syndrome"
- Magnesium contributes to sufficient magnesium at calving
- Selenium strengthens the immune system after calving
- Propylene glycol prevents ketosis

Benefits and effect:

- Reduces the risk of milk fever and "downer cow syndrome"
- Provides easily absorbable calcium and phosphorus
- Selenium strengthens the immune system and reduces the risk of retained placenta
- Easy to administer with a drench gun

Packaging:

- 5000 ml per can
- 3 cans per box
- 48 boxes per pallet

Application:

1st dose (250 ml): Immediately after calving.
 2nd dose (250 ml): 10-14 hours after calving.
 High-risk cows can additionally be supplemented with 1 dose 24 hours before calving and 1 dose 24 hours after calving.

After treatment at calcium infusion:

1st dose: 2 hours after calcium infusion
 2nd dose: 12 hours after calcium infusion

Consumption:

- 2-4 doses per cow in the period around calving
- 20 doses per can
