

EnergyBol™

Energy-rich bolus for dairy cows

EnergyBol is a fast releasing energy-rich bolus, containing a combination of rapidly and easily absorbable energy, calcium, and magnesium, which supports the cow with additional energy shortly after calving.

EnergyBol contains:

- Calcium propionate adds easily absorbable energy and calcium
- Rumen protected vegetable fat adds easily absorbable energy
- Magnesium contributes to a higher level of mobilization of calcium in the blood after calving

Benefits and effect:

- Dissolves in the rumen within 25 minutes adding 446 kcal to the cow
- Supports the energy balance and milk production after calving
- Supports early feed intake
- Provides additional calcium in the blood after calving
- Easy to administer with a bolus applicator

EnergyBol is covered by EU patent.

Packaging:

- 4 pcs. per zip lock bag
- 20 pcs. per case
- 6 cases per box

Application:

1st bolus: 3-5 days before calving
2nd bolus: Immediately after calving
High-risk cows can additionally be supplemented with 1 bolus 4-5 days after calving.

After treatment:

1st bolus: 3-5 days prior to calving
2nd bolus: Shortly after calving
If needed, another bolus can be assigned 4-5 days post calving

Consumption:

- 2-3 boluses per cow in the period around calving
