

EnergyBooster™

Energy supplement for fresh cows

EnergyBooster is an energy supplement for fresh cows providing the cow with water and easily absorbable energy after calving

EnergyBooster contains:

- Lactose and sweet whey powder as energy sources with good palatability
- Dextrose provides easily absorbable energy
- Electrolytes restores the electrolyte balance after calving
- Citric acid stabilizes the rumen micro flora

Fordele og effekt:

- Contributes to stable blood sugar level thus preventing ketosis
- Stimulates feed intake
- Re-establishes fluid and electrolyte balance
- Optimizes pH level in the rumen in order to prevent acidosis
- Water therapy (30 L) prevents dehydration, displaced abomasum and retained placenta

Anvendelse:

Dissolve 0.5 – 1 kg EnergyBooster in 15 litres of hot water (40 °C) and administer immediately after calving when the cow's appetite for drinking is high. Subsequently the cow should be offered additionally 15 litres of luke-warm water to ensure sufficient water intake.

Forbrug:

- 0.5 - 1 kg per cow
- 10-20 treatments per bucket

Pakning:

- Bucket of 10 kg
- 48 buckets per pallet
