

Ketoglyk™

Palatable energy supplement for high-yielding dairy cows

Ketoglyk is a palatable, glucose forming, energy supplement, ensuring fresh cows a high blood sugar level and reducing the risk of weight loss after calving.

Ketoglyk contains:

- Propylene glycol is metabolized into glucose in the liver which supports blood sugar level
- Glycerine is metabolized into glucose in the liver and provides good palatability
- Calcium propionate provides easily absorbable energy and calcium
- Niacinamide has a positive effect on the cow's fat metabolism and supports therefore milk production

Benefits and effect:

- Ensuring easily absorbable energy
- Reduces the risk of weight loss
- Provides high blood sugar level
- Supports appetite and feed intake
- Optimizes milk production
- Supports fertility

Application:

Administer Ketoglyk from calving until 6 weeks after calving. Administer 250 ml per cow daily spread out on two feedings. Administer maximum 500 ml per animal daily.

Consumption:

- 250 ml per cow daily

Packaging:

- 20 kg can
- 210 kg drum
- 1,050 kg IBC
