

DisoLyt®

Effervescent electrolytes with lactic acid bacteria

DisoLyt is an effervescent dietetic complementary feed which stabilizes and restores the fluid and electrolyte balance in pigs suffering from diarrhoea. DisoLyt contains the important electrolyte salts Na^+ , K^+ , and Cl^- , which are optimized from the American SID concept (Strong Ion difference), ensuring quick and efficient rehydration.

DisoLyt contents:

- Electrolytes Na^+ , K^+ , Cl^- which efficiently re-establish the electrolyte balance
- Alkaline buffer prevents blood acidosis due to diarrhoea
- Lactic acid bacteria inhibits growth of pathogenic microorganisms
- Glycine stimulates the absorption of Na^+ from the intestine
- Dextrose ensures easily absorbable energy and stimulates absorption of Na^+

Benefits and effect:

- Provides easily absorbable electrolytes and energy
- Counteracts digestive disturbances
- Re-establishes the microflora in the intestinal tract
- Neutralizes blood acidosis
- Easy to administer
- No dosing mistakes

Content	Recommend. mmol/L	DisoLyt mmol/L
Na^+	70-145	112
K^+	20-30	22
Cl^-	50-100	54
SID	60-80	80

Application:

Dissolve 1 sachet of 100 grams in 2 litres of lukewarm water (35-40 °C) and administer per 4-6 piglets (weight 7-13 kg/pig) twice a day for 1-3 days. The DisoLyt powder is dissolved in water without stirring.

Consumption:

100 grams DisoLyt is enough for approx. 50 kg body weight

Packaging:

- 25 sachets of 100 grams per case
- 6 cases per box
