

Improve performance and intestinal health

InflaMove®

A natural feed product to improve gut health

InflaMove® is a phytogenic feed supplement for supporting healthy gut function. InflaMove® can be used in premixes as well as in pelletized complete feed for pigs.

InflaMove® contains:

- Selected botanical ingredients from herbs, seeds and fruit for supporting a beneficial gut function
- The herbal flavouring components increase palatability and utilisation of feed

Benefits and effect:

- Reduces the occurrence of soft/liquid faeces
- Reduces the need for antibiotic treatments due to PWD
- Beneficial change in gut microbiota
- Improves feed conversion and performance

Application:

- Piglets up to 30 kg: 400-800 g per 1000 kg complete feed. Or 400 g per ton of feed in combination with acidifiers
- Grower, finishers and sows: 300 g per 1000 kg complete feed

Packaging:

- 15 kg bags – 50 bags per pallet or in big bags

Results

Figure 1: Production results

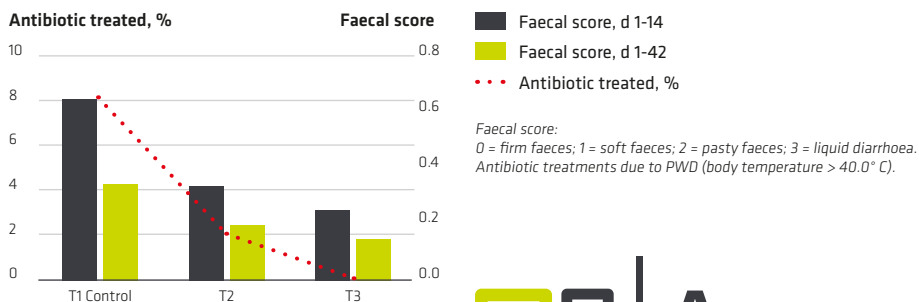

Feed conversion ratio was significantly improved when InflaMove was added. Also, overall average daily weight gain was improved from day 1 to 42.

	Day 1-14 Weight: 8-12 kg			Overall, day 1-42 Weight: 8-30 kg		
	T1	T2	T3	T1	T2	T3
DWG in g	309	337	348	519 ^a	543 ^b	551 ^b
ADFI in g	445	441	446	814	805	798
FCR kg/kg	1.45 ^a	1.31 ^a	1.28 ^a	1.57 ^a	1.48 ^b	1.45 ^b

a / b : different letters indicates different significance level of P<0.001

Figure 2: Faecal score and antibiotic treatment

Faecal scores were softer during the first 14-day period indicating occurrence of PWD in combination with liquid diarrhoea. InflaMove significantly improves the faecal consistency (P<0.01). The need for therapeutic antibiotic treatments due to PWD was lowered in the T2 and T3 group compared to control.
