

NovaWean®

Developed for zinc free weaning of piglets

NovaWean® is a feed supplement for piglets to ease the transition from sow milk to weaner- and starter feed, and removes the need for ZnO during weaning. The high content of insoluble, water binding fibers, together with the phytogetic components from selected plants, ensures a beneficial function of the gastro-intestinal tract in piglets during the critical weeks around weaning.

NovaWean contains:

- Expanded insoluble fiber from legume seeds with fast and high water-binding capacity (minimum 5:1)
- 65 % insoluble fibers and only 6 % soluble fibers
- Selected phytogetic components from rosemary, grape, Fenogreek seeds, olives and quillaja.
- A broad spectrum of terpenes, polyphenols and saponins.

Benefits and effects:

- The functional insoluble fibres stimulate a healthy gut function
- Reduces stress related immune reaction
- Improves firm faecal consistency
- Improves feed efficiency
- Beneficial change in gut microbiota
- Reduces the incidences of Post-Weaning-Disorder
- Reduces the need for antibiotic treatment

Application:

To be mixed 15 kg / ton of feed ($\approx 1.5\%$) in complete pre-weaner and weaner diet, until 14 days post weaning.

Packaging:

- 15 kg bags – 750 kg per pallet
- 700 kg Big bags
