

PiggyLift™

Complete nutritional supplement to weak born piglets

PiggyLift is a fast-acting and efficient nutritional supplement to weak born piglets with a birth weight below 1000 grams. Approximately 15 % of all new-born Danish piglets have a birth weight below 1000 grams, and often need extra energy to find their way to the udder and get the important colostrum.

PiggyLift contains:

- Medium chain fatty acids (MCFA) for fast and efficient energy absorption
- Colostrum powder which is immunoglobulins strengthening the pig's natural resistance and vitality
- Egg yolk powder as easily absorbable protein and energy
- Lactic acid supports growth of beneficial microorganisms
- Vitamin A, D3, E to support the pig's natural resistance

Benefits and effect:

- Supports colostrum intake
- Strengthens the pig's natural resistance
- Supports a positive survival rate among piglets in large litters
- 2 years of shelf life when stored at room temperature

Application:

Administer 1-2 applications of PiggyLift for small and weak born piglets as soon as possible after birth. If necessary, repeat the following day. 1 pump stroke PiggyLift is equivalent to 2 ml.

Consumption:

1 bottle of PiggyLift is enough for approx. 75 piglets

Packaging:

- 9 x 250 ml bottles per case incl. 4 dispensers
- 6 cases per box
