

ProtectOx™ DW

Counteracts heat stress with a high content of antioxidants

ProtectOx DW is a liquid acidifier for preservation and support of the gastrointestinal function in pigs and sows. Besides containing a high content of organic acids, ProtectOx DW has a high content of polyphenols with a natural high content of antioxidants, having a positive impact on animals exposed to stressful situations, as for example heat stress.

ProtectOx DW contains:

- Organic acids with a strong antibacterial effect which reduces growth of pathogenic bacteria
- Selected natural polyphenol extracts with a high content of antioxidants which inhibits oxidative stress the animal and strengthens the immune system

Benefits and effects:

- Reduces growth of pathogenic bacteria in the drinkingwater and the gastrointestinal tract
- Counteracts oxidative stress including heat stress
- Supports feed digestion
- Improves animal growth performance
- Easy to administer through the drinking water

Application:

Administer ProtectOx DW in drinking water with 1.2-2.0 kg per ton of water. Optimum pH value of the finished mixture is 3.8-4.2.

ProtectOx can be use in the entire lifecycle of the pig or it can be used in the Weaner or Finisher period

Consumption:

1.2-2.0 kg per ton of water

Packaging:

25 kg cans, 225 kg drums or 1100 kg IBC's
