

ReVital™

Efficient electrolytes with pectins and lactic acid bacteria

ReVital is a dietetic complementary feed which stabilizes and restores the fluid and electrolyte balance in pigs suffering from diarrhoea. ReVital contains the important electrolyte salts Na⁺, K⁺, and Cl⁻, which are optimized from the American SID concept (Strong ion difference), ensuring quick and efficient rehydration.

ReVital contents:

- Electrolytes Na⁺, K⁺, Cl⁻ which efficiently re-establish the electrolyte balance
- Pectin substances protect the intestinal wall and bind toxins
- Alkaline buffer prevents blood acidosis due to diarrhoea
- Dextrose ensures easily absorbable energy and stimulates absorption of Na⁺
- Lactic acid bacteria inhibits growth of pathogenic microorganisms

Benefits and effect:

- Adds an optimum supplement of essential electrolytes
- Neutralizes blood acidosis
- Ensures easily absorbable energy
- Re-establishes the micro flora in the intestinal tract
- 2 years shelf life in dry and closed package

Content	Recommend. mmol/L	ReVital mmol/L
Na ⁺	70-145	119
K ⁺	20-30	27
Cl ⁻	50-100	66
SID	60-80	80

Application:

Mix 120 grams ReVital in 2 litres of lukewarm water (35-40 °C) and administer per 4-6 piglets (weight 7-13 kg/pig) twice a day for 1-3 days.

Consumption:

10 kg ReVital is enough for approx. 80 allocations

Packaging:

10 kg bucket – 48 buckets per pallet
