

YoghurLac[®] Ferro

Tasty iron-yoghurt for piglets

YoghurLac[®] Ferro is a tasty, energy-rich and acidified yoghurt product in powder form with iron. It gets thick like yoghurt when mixed with water. YoghurLac[®] Ferro can be used for 3 days to piglets in second week after birth to supplement the first iron injection.

YoghurLac Ferro contains:

- Milk powder, lactose and dextrose, which is easily absorbable energy and milk protein
- Iron in a bioavailable form providing a higher haemoglobin level of the blood
- Natural flavouring compounds with antioxidative properties
- Combined yeast cultures support a beneficial gut microflora
- Citric acid as acidifier, providing a fresh taste and reduced bacterial growth

Benefits and effect:

- Tasteful iron- and energy supplement for optimal growth
- Optimize haemoglobin level in blood and avoid iron deficiency in piglets
- Strong antibacterial effect, supporting a beneficial gut environment
- Low pH which will keep harmful bacteria at a low level

Packaging:

- 8 kg bucket – 48 buckets per pallet
- 15 kg bags – 66 bags per pallet

Application:

Supplement to sow's milk and iron injection:

- Mix 125 grams of YoghurLac[®] Ferro into 1 litre of lukewarm water (15-25 °C) and stir until it thickens. Administer in a feed trough for piglets in the farrowing pen for 3 days in second week after birth.

Consumption:

8 kg YoghurLac[®] Ferro powder is enough for mixing 64 litres of YoghurLac[®] Ferro.
8 kg YoghurLac[®] Ferro is enough for 21 litters for 3 days.

Haemoglobin level In blood	1 Iron Injection			YoghurLac Ferro + 1 Iron Injection		
	No. Piglets	Pct. Piglets	Mean Value	No. Piglets	Pct. Piglets	Mean Value
Below 89 g/L	53	45.3	79.0	17	12.3	82.4
90-109 g/L	51	43.6	98.1	73	52.8	100.7
Above 110 g/L	13	11.1	112.5	48	34.8	116.8
Total	117		91.1	138		104.0
